I came across this article
out of Michigan State
University, about the issue
of teaching intro physics to
life science majors. I find
it rather interesting
(amusing?) that this is
still an issue being
discussed at many large
universities when smaller
universities and community
colleges have long focused

on designing such courses for these life sciences/pre-med majors.

Physics and Physicists: Intro Physics for Life Sciences

University Physics for the Physical and Life Sciences utilizes six key features to help students learn the principle concepts of university physics:

- A seamless blend of physics and physiology with interesting examples of physics in students' lives,
- A strong focus on developing problem-solving skills (Set Up, Solve, and Reflect problem-solving strategy),
- Conceptual

selective use of calculus,
this text provides a concise
approach to basic physics
concepts using a fresh
layout and many conceptual
examples.

The class description says that it is "intended primarily for majors in marine, biological, health sciences, environmental studies and physical therapy." It covers the ideas in general physics but the focus is relating these ideas to life sciences.

Physics Vs. Physics for Life Sciences | Student Doctor Network

Almost all areas of modern life sciences integrally involve physics in both experimental techniques and in basic understanding of structure and function.

"Physics for the Life Sciences" reveals the beauty of physics while highlighting its essential role in the Life Sciences. This book is the result of a rather straightforward idea: to offer Life Sciences students a 'Physics for the Life Sciences' course and a textbook that focuses on the applications and relevance of physics in the life sciences.
