Probability Concepts in Engineering: Emphasis on ...

The second edition of this well-known book (previously titled Probability Concepts in Engineering Planning and Design) by Alfredo Ang and Wilson Tang, two world-renowned educators, has been revised to simplify understanding the fundamentals of probability and statistics for engineering students. The second edition includes many new and expanded topics, including hypothesis testing and confidence intervals in regression analysis.

Read Book Probability Concepts In Engineering Solution Manual Tang

Probability Concepts in Engineering: Emphasis on ...

Therefore when the events are independent, the joint probability is just the product of the individual marginal probabilities of the events: $P(A \cap B) = P(A) P(B)$. So $P(\text{coin landing heads and rolling a 6}) = P(A=\text{heads}, B=6) = 1/2 \cdot 1/6 = 1/12$. Notice that I wrote $P(A=\text{heads}, B=6)$.
