Commented: Image Analyst on 11 Nov 2016. Hi, As a part of my project, I have implement a road detection mechanism that takes in grayscale satellite images and produces an output that detects all the straight, curved and narrow roads.

This example shows how to implement an integrated lane keeping assist (LKA) controller on a curved road with lane detection. It also shows how to test the controller in Simulink using synthetic data generated by the Automated Driving Toolbox, componentize it, and automatically generate code for it.
