Sugilite is a rare mineral and a gemstone best known for its vibrant pink to purple color. Diamond Producers Diamonds are mined in many countries and their relative importance changes frequently.

~~Gemstones: Facts, photos, and information for over 100 gems.~~

Rocks are made of minerals. Only a few minerals are rock forming and most rock is made from a combination of the commonest of these such as feldspars, quartz, mica, olivine, calcite, pyroxene and amphiboles. Most other minerals, of which there are over 3000 different types, are rarely present in quantities large enough to be considered rock forming.
