In an RSLogix 5000 based PLC, the PID Instruction can be implemented in Ladder Logic, tied to an input signal and be told to control an output based on the gains set in the configuration. By simulating the instruction on the controller, it's possible to practice working with and observing this instruction in action.

### *RSLogix PID Loop PLC Programming | Example of PID Control ...*

Purpose of this Manual This manual explains how to configure security for RSLogix 5000 software. It also explains how to setup source protection for your logic and projects. This manual is one of a set of related manuals that show common procedures for programming and operating Logix5000 controllers.
