The Self-Care or Self-Care Deficit Theory of Nursing is composed of three interrelated theories: (1) the theory of self-care, (2) the self-care deficit theory, and (3) the theory of nursing systems, which is further classified into wholly compensatory, partial compensatory and supportive-educative. It is discussed further below.

Dorothea Orem: Self-Care Deficit Nursing Theory - Nurseslabs

The major assumptions of Orem's Self-Care Deficit Theory are: People should be self-reliant, and responsible for their care, as well as others in their family who need care. People are distinct individuals. Nursing is a form of action. It is an interaction between two or more people. Successfully ...

The Self-Care Deficit Nursing Theory (SCDNT) is one of the nursing theories most commonly used in practice (Im & Chang, 2012). Orem's dedication to the concept of self-care resulted in a nursing theory appropriate for present and future health care scenes. The earliest development of the theory occurred in 1956 (Orem, 1985).

*Dorothea Orem's Self-Care Theory -
Current Nursing*

The self care deficit theory proposed by Orem is a combination of three theories, i.e. theory of self care, theory of self care deficit and the theory of nursing systems. In the theory of self care, she explains self care as the activities carried out by the individual to maintain their own health.

The Self-Care Deficit Nursing Theory (SCDNT) developed by Dorothea Orem and published in 1971 is one of the most influential and extensively utilized theories in nursing. The theory stemmed from research conducted when Orem was tasked by the U.S. Department of Health and Welfare (HEW) to improve nurse training.

Self Care Deficit Theory of Nursing

Bookmark File PDF Self Care Theory In Nursing

The theory puts forth that the role of nursing is to fill in the gaps where patients cannot care for themselves. Orem believed that patients would perform their own care to maximize their own well-being and would only require care from a medical professional when they are unable to care for themselves.

All About Dorothea Orem's Self-Care Nursing Theory

Written for nursing theorists, researchers, administrators, and graduate students, the text addresses the relationship of self-care theory and evidence-based care in nursing, and provides a solution to improving contemporary healthcare outcomes. The book is divided into three sections.

care, self-care deficit, and nursing systems. In the theory of self-care, adults learn and act intentionally to ensure their survival, well-being, and good quality life. In the self-care deficit theory, the importance of nursing is highlighted because humans have limitations to performing self-care.

Dorothea E. Orem Self-Care Deficit Theory of Nursing ...

General theory of nursing is correctly referred as self-care deficit nursing theory which includes four other theories. There are six primary concepts and peripheral concepts in the Self Care Deficit Nursing Theory (SCDNT).
