NTRP 4-04.2.5 TM 3-34.42 AFPAM 32-1020 MCRP 3-17.7F Construction Project Management December 2012 Navy Tactical Reference Publication (NTRP) 4-04.2.5/Technical Manual (TM) 3-34.42/Air Force Pamphlet (AFPAM) 32-1020/Marine Corps Reference Publication (MCRP) 3-17.7F, Construction Project Management, describes construction project planning, scheduling, and execution by military engineers. In today's operational environment, engineers are increasingly employed as joint forces with multiple military service engineers under a single commander. This necessitates standardized construction project management for military engineers across the operational forces. Although the methods and procedures used in this publication are consistent with construction industry practices, military engineers face distinct challenges when operating in contingency operations. The fundamental principles in this publication apply to most construction projects, however, military engineers may adapt these principles to specific contingency situations.

Vols. for 1970-71 includes manufacturers' catalogs.

With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.
