'Shouldn't I be Feeling Better by Now' is an essential read for therapists, clients and prospective therapists and clients. In the preface it is acknowledged that many people benefit from therapy. However, while there are copious accounts of successful therapy available and such accounts are welcomed by the profession, there exists a dearth of accounts of unsuccessful and frequently deeply damaging therapy.

I had a mc just over 3m ago. I was feeling a lot better, especially over the last month or so, much calmer and even quite relaxed about ttc. I'd sv

Should I be feeling better by now? | Mumsnet

I should think you ought to be feeling a little better now T4 has risen and TSH dropped but your TSH is still too high so I wouldn't expect you to feel well yet. 8 days ago your dose was increased to 75mcg. It will take 7-10 days for the increased dose to be absorbed before it starts working and up to six weeks to feel the full impact of the dose.

Folks, if you get COVID - it's the best thing that'll ever happen to you. You can do a quick drive-through the hospital, get your doctors to lie their fcking asses off, get all the experimental drugs, and you'll walk out feeling better than you did just 20 years ago. "Don't let it dominate your life?"

Trump Sends Two Dangerous Tweets and Announces He's ...

As hard as the I-should-be-better syndrome can be, I actually see it as a sign of deep self-love to believe you deserve good stuff. You care enough to shame yourself over not having what you know you're capable of. Now maybe we can come together in the name of all that self-love and do it without the conditions.

6 ways to Deal with "I Should Be Better" Syndrome

Feel better? You shouldn't. Opinion by Editorial Board. September 24, 2020 at 5:41 PM EDT. IT WOULD have been unthinkable, not long ago, for a White House to have to issue such a clarification.

Opinion | The White House says Trump will accept election ...

It is usually seen that many patients start feeling better within 2 to 3 cycles of chemo with some improvement in their symptoms. Certain types of cancers may not respond well to chemo even after 6 cycles, in which case it may take longer to feel better. As each chemo regimen follows a specific protocol, the duration between cycles varies and so do the months.
