This volume contains three contributions which are potentially of interest to those concerned with tropical nutrition. The first, by J. K. AIKAWA (p. 112), is a general review of the Biochemistry and physiology of magnesium. The short section devoted to magnesium deficiency in man makes no mention of the occurrence of this deficiency in protein-energy malnutrition.

Some aspects of human and veterinary nutrition.

Three foundations for human development are to live a healthy and creative life, to be knowledgeable, and to have access to resources needed for a decent standard of living.

What is Human Development? | Human Development Reports

Human geography or anthropogeography is the branch of geography that deals with humans and their communities, cultures, economies, and interactions with the environment by studying their relations with and across locations. It analyzes patterns of human social interaction, their interactions with the environment, and their spatial interdependencies by application of qualitative and ...

The human soulin the works of Plato and Aristotle has a nature that is divided in a specifically human way. One part is specifically human and rational, being further divided into (1) a part which is rational on its own; and (2) a spirited part which can understand reason.

Human nature - Wikipedia

Geotrichum candidum is stated to occur in the alimentary tract of 25-30% of individuals and to be generally well tolerated, though there is indisputable evidence that it may on rare occasions become established in the system in the form of cutaneous, pulmonary, or digestive lesions and cause severe disturbances. Among laboratory animals only piglets have proved slightly susceptible.
