Focus Gastroenterology

Gastroenterology is a specialized area of medicine that focuses on the GI tract. Some gastroenterologists treat general diseases of the GI. Others focus on a particular type of gastroenterology.

What Is a Gastroenterologist?

Dysphagia refers either to the difficulty someone may have with the initial phases of a swallow (usually described as "oropharyngeal dysphagia") or to the sensation that foods and or liquids are somehow being obstructed in their passage from the mouth to the stomach (usually described as "esophageal dysphagia"). Dysphagia is thus the perception that there is an impediment to the normal ...

English | World Gastroenterology Organisation

The global focus on metabolic liver disease is appropriate, given that NAFLD affects roughly 25% of the world's population and has become a main focus in liver transplant programs. Our vision for this special issue of Gastroenterology is to provide an up-to-date resource for clinicians and researchers on the risk factors, natural history, diagnosis, and treatment of NAFLD. January 2020 ...

Home Page: Gastroenterology

The current focus of his research is on the impact of microbiome on dysphagia associated with head and neck cancer therapies. In addition to general adult gastroenterology, Peter has a special interest in oesophageal disorders, including oesophageal dysmotility, gastro-oesophageal reflux, and eosinophilic oesophagitis. He serves as a consultant gastroenterologist in the Department of ...

Team - St George Swallow Centre

"At the end of life, even if deemed to have an 'unsafe swallow' a risk management approach may offer the patient the best quality of life. If in doubt a trial of nasogastric feeding with clear agreed objectives may be appropriate. Tube feeding should then be withdrawn if failing to achieve the objectives. 'Nil by mouth' should be a last resort, not the initial default option" (RCP ...

Dysphagia Management for Older People | British Geriatrics ...

Gastroenterology is the study of the function and diseases of the esophagus, stomach, small intestine, colon, rectum, pancreas, gallbladder, bile ducts, and liver. It involves an in-depth understanding of digestion, nutrient absorption, gastrointestinal motility, and the function of the liver indigestion. Conditions Treated . The aim of the gastroenterologist is to identify and treat ...
