Programming with STEP 7 - Siemens

STEP 7 (TIA Portal) is already characterized by a comprehensive range of integrated functions. But for tasks beyond standard automation requirements, these functions can be expanded by using tailored options that can be seamlessly integrated into STEP 7 and TIA Portal, such as failsafe applications or technological tasks.

The components for programming (STEP 7) and visualization (WinCC) are not separate programs, but rather editors of a system that accesses a common data base. All data are stored in a common project file. You use a common user interface for all tasks to access all programming and visualization functions at all times.

Working with STEP 7 - Siemens

Hi Everyone, I'm currently programming Siemens S7-300 PLC's using Step 7 Pro v5.5 (mainly in STL including networking) and programming HMI's (Multi Panels and Touch) using WinCC Flexible 2008. I recently wanted to purchase a new HMI (Comfor

7 Lite package. The four major limitations in STEP 7 Lite verses the more advanced STEP 7 package are: 1. Support limited to the SIMATIC S7-300 PLC, the C7 all-in-one PLC and HMI, and the intelligent CPUs of the ET200 distributed I/O family. So no programming for the S7-200 or S7-400 PLC series. 2. No networking whatsoever. Remote I/O racks (IM modules) are
