carving, modeling is essentially a building-up process in which the sculpture grows organically from the inside. Numerous plastic materials are used for modeling. The main ones are clay, plaster, and wax; but concrete, synthetic resins, plastic wood, stucco, and even molten metal can also be modeled.

Sculpture - Modeling | Britannica

An art model poses for any visual artist as part of the creative process, providing a visual reference for the human figure in a work of art. However, more than being simply the subject of art, models are often thought of as muses, a source of inspiration without whom the art would not exist. The most common types of art works that use models are figure drawing, figure painting, sculpture and ...
