From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space. Stephen Kern writes about the onrush of technics that reshaped life concretely--telephone, electric lighting, steamship, skyscraper, bicycle, cinema, plane, x-ray, machine gun--and the cultural innovations that shattered older forms of art and thought--the stream-

Culture and Time You're just in time to explore one of the most interesting, yet possibly one of the most underestimated topics of all time: time itself. There is, in fact, a wealth of concepts to be explored when it comes to this subject. Although we may not always realize it, time is constantly a part of our everyday lives.

INTRODUCTION. From around 1880 to the outbreak of World War I a series of sweeping changes in technology and culture created distinctive new modes of thinking about and experiencing time and space. Technological innovations including the telephone, wireless telegraph, x-ray, cinema, bicycle, automobile, and air- plane established the material foundation for this reorientation; independent cultural developments such as the stream-of-con- sciousness novel, psychoanalysis, Cubism, and ...

Chronemics is the study of the use of time, and the way that time is perceived and valued by individuals and cultures, particularly as regards non-verbal communication. These time perceptions include things like punctuality, willingness to wait, approaches to face-to-face interactions, and reactions to time pressure.
