For me, immersed in The Flooded Earth:
Our Future In a World Without Ice Caps, it
was striking evidence of what Peter D. Ward
writes about: the loss of the polar icecaps
and the melting of ice sheets and glaciers,

A professor of biology and Earth and space science, Peter D. Ward has not only a firm grasp on the reality of climate change but also the rare ability to explain its details in language even I can understand. The Flooded Earth did not leave me feeling particularly hopeful; this threat is real and imminent, with no easy solution. On the
