The ancient Egyptians believed that a soul was made up of many parts. In addition to these components of the soul, there was the human body. According to ancient Egyptian creation myths, the god Atum created the world out of chaos, utilizing his own magic. Because the earth was created with magic, Egyptians believed that the world was imbued with magic and so was every living thing upon it. When humans were created, that magic took the form of the soul, an eternal force which resided in and with

Human digestive system, the system used in the human body for the process of digestion. The human digestive system consists primarily of the digestive tract, or the series of structures and organs through which food and liquids pass during their processing into forms absorbable into the bloodstream. The system also consists of the structures through which wastes pass in the process of elimination and other organs that contribute juices necessary for the digestive process.

Traditional Chinese medicine (TCM) is a branch of traditional medicine in China. It has been described as "fraught with pseudoscience", and the majority of its treatments as having no logical mechanism of action.. TCM is said to be based on Compendium of Materia Medica and Huangdi Neijing.The practice includes various forms of herbal medicine, acupuncture, cupping therapy, gua sha, massage ...
