Sir Isaac Newton (1642 – 1727) was one of the greatest scientists of all time, a thinker of extraordinary range and creativity who has left enduring legacies in mathematics and physics ... in his second ...

The Cambridge Companion to Newton

If true, this is very close to the theorized upper mass limit of around 2.3 solar masses for neutron stars, representing an excellent laboratory for studying these ultra-dense sta ...

This Record-Breaking 'Black Widow' Pulsar Is The Most Massive Neutron Star Yet

Romani, a professor of physics at Stanford ... hundreds of times per second. This is because the neutron star becomes more energized as it strips material away from the companion star.

'Black widow' is heaviest neutron star after devouring its stellar companion

Observations of faint, planet-size star help weigh its millisecond pulsar companion. A dense, collapsed star has shredded and consumed nearly the entire mass of its stellar companion and, in the ...

Heaviest Neutron Star Ever Discovered Is a " Black Widow " Devouring Its Mate

Astronomers have observed the biggest neutron star, one aptly classified as a 'black widow,' has grown tremendously huge by sucking up most of the mass ...

Unhappy cosmic marriage ends in heaviest 'black widow' neutron star

Focusing on aerospace and high performance applications, we conduct materials research and development to better understand the fundamental physics of the material ... tailored fiber placement ...

Advanced Composite Manufacturing, Modeling & Characterization

A dense, collapsed star spinning 707 times per second —making ... " As the companion star evolves and starts becoming a red giant, material spills over to the neutron star, and that spins ...

Heaviest neutron star to date is a " black widow " eating its mate

While capturing images of an asteroid called Ida on the way, mission scientists were shocked to find a second ... this material builds up over millions of years into a small companion, evidenced ...

Behold the Weird Physics of Double-Impact Asteroids

In thirteen chapters that represent an ideal companion to the author's influentialReason and ... medical theory and Plato's epistemology and moral philosophy, to Aristotle's physics and metaphysics, ...

Knowledge, Nature, and the Good: Essays on Ancient Philosophy

Adense, collapsed star spinning at 707 times per second—making it one of the fastest spinning neutron stars in the Milky Way galaxy—has shredded and consumed nearly the entire mass of its stellar ...

Stanford University: Heaviest neutron star to date is a " black widow " eating its mate

A dense, collapsed star spinning 707 times per second—making it ... point," Filippenko said. "As the companion star evolves and starts becoming a red giant, material spills over to the neutron ...
