The new ISO Guide 80: Guidance for the in-house preparation of quality control materials (QCMs)

(PDF) The new ISO Guide 80: Guidance for the in-house ...

ISO Guide 80 outlines the essential characteristics of reference materials for quality control (QC) purposes, and describes the processes by which they can be prepared by competent staff within the facility in which they will be used (i.e. where instability due to transportation conditions is avoided). The content of this Guide also applies to inherently stable materials, which can be transported to other locations without risk of any significant change in the property values of interest.

ISO - ISO Guide 80:2014 - Guidance for the in-house ...

ISO/REMCO, the ISO Committee on Reference Materials, has prepared ISO Guide 80, a guidance document for the in-house preparation of quality control materials (QCMs). QCMs are mostly used to monitor the performance of laboratory methods that have already been validated over time to be able to detect change or when a method goes out of statistical control.

The new ISO Guide 80: Guidance for the in-house ...

ISO Guide 80 – Guidance for the in-house preparation of quality control materials (QCMs) Reference materials (RMs) are widely used in measurement laboratories for a variety of purposes, and it is important to recognise that the material most appropriate for a particular application should be used. Certified reference materials (CRMs) are used for method validation, the calibration of a measurement system and all other aspects of the evaluation of the measurement system where the trueness ...

ISO Guide 80 - European Standards Online Store

The general requirements laid out in ISO 17034 include a characterisation strategy. As characterisation approaches are important for reference materials production, scientists from the JRC and the National Metrology Institute of South Africa provided a more easy to read summary to the new ISO Guide 35 chapter on characterisation.
