Thee Temple ov Psychick Youth (TOPY) will be remembered for its crucial influence on youth culture throughout the 1980s, popularizing tattooing, body piercing, "acid house" raves, and other ahead-of-the-curve cultic flirtations and investigations. Its leader was Genesis P-Orridge, co-founder of Psychick TV and Throbbing Gristle, the band that created the industrial music genre. The limited signed cloth edition of Thee Psychick Bible quickly sold out, creating demand for any edition of this 544-page book, which will

The spiritual power of the Feminine shines forth in this psychological study of four Old Testament heroines from Jesus' family tree. Tamar, Rahab, Ruth, and Bathsheba are the only women mentioned by name in the Gospels' genealogies and, for Ann Belford Ulanov, this indicates that they impart something essential to the lineage of Christ. By exploring their brave and

unconventional lives, she demonstrates how salvation enters the world in the feminine mode of being human, through these women's embodiment of such powerful and deeply feminine qualities as ingenuity, audacity, determination, compassion, seduction, and devotion.

A groundbreaking approach to sound in sci-fi films offers new ways of construing both sonic innovation and science fiction cinema. Including original readings of classics like *The Day the Earth Stood Still*, *2001: A Space Odyssey*, *Star Wars*, and *Blade Runner*, *The Sound of Things to Come* delivers a comprehensive history of sound in science fiction cinema. Approaching movies as sound objects that

combine cinematic apparatus and consciousness, Trace Reddell presents a new theory of sonic innovation in the science fiction film. Reddell assembles a staggering array of movies from sixty years of film history—including classics, blockbusters, B-movies, and documentaries from the United States, Britain, France, Germany, Japan, and the Soviet Union—all in service to his powerful conception of sound making as a speculative activity in its own right. Reddell recasts debates about noise and music, while arguing that sound in the science fiction film provides a medium for alien, unknown, and posthuman sound objects that transform what and how we hear. Avoiding genre criticism's tendency to obsess over utopias, *The Sound of Things to Come* draws on film theory, sound studies, and philosophies of technology to advance conversations about the avant-garde, while also opening up opportunities to

The second of Victor P. Hamilton's two-volume study of Genesis for the NICOT series, this prodigious and scholarly work provides linguistic, literary, and theological commentary on Genesis 18-50. Beginning with Abraham's reception of the three visitors and his intercession before Yahweh on behalf of Sodom and Gomorrah (Gen. 18) and continuing through the end of the Joseph story (Gen. 50), the overarching theme of Hamilton's commentary is Yahweh's faithfulness to his promised word and his covenant commitments to those whom he has chosen to receive that promised word. Special features of this commentary include its serious attention to important matters of biblical translation from the Hebrew language into English, copious footnotes that direct readers to further and

more extensive sources of information, and frequent references to the New Testament writers' reading of Genesis. Hamilton's work will greatly benefit scholars, seminarians, and pastors who seek solid exegesis of the Bible's foundational book.

Volume III, Part 2 of the Hebrew Bible / Old Testament-Project!

This volume provides an introduction to psychological interpretations of the Hebrew Bible -- with the Garden of Eden story as a test case. It approaches the text from Freudian, Jungian, and Developmental psychologies, comparing and contrasting the different methods while taking on the hermeneutical issues.

Ricoeur's work is used to establish criteria for adequate interpretation. Genesis 3 presents a fruitful text for psychological

interpretation given its importance in Western culture. Its themes of sexuality, guilt, consciousness, and alienation are issues of great concern for everyone in our society. Kille's aim is to locate psychological criticism within the field of biblical studies and to propose a hermeneutical framework for describing and evaluating psychological approaches. The second part is devoted to analysis of different evaluations of Genesis 3 from the three chosen psychological perspectives.

In this accessible integration of psychology and theology, Marjorie Lindner Gunnoe offers a comprehensive understanding of personhood from both perspectives, examining the intersection of biblical perspectives with established theories of social development as proposed by Erik Erikson, B. F. Skinner, Evolutionary

Psychology, and more.

Today's society faces many problems that cannot be solved by the application of reason, logic or medicine. Some of these include alcoholism, suicide, drug addiction and child abuse to name but a few. Many mental health problems are on the increase such as depression, phobias and anxiety with no obvious solution in sight. In Gods and Diseases, David Tacey argues that the answers lie in leaving behind the confines of conventional medicine. Instead we should turn towards spirituality and to what he calls 'meaning-making', to make sense of our physical and mental wellbeing and explore how the numinous may help us to heal.
