Design and Analysis Tools - Trane

HVAC design tools include such popular items as the Trane Ductulator™, psychrometric charts, and load estimating forms.

HVAC Design Tools | Trane Commercial

Understand the differences between comfort cooling and indoor agriculture air conditioning. Determine proper supply air humidity ratio and temperature conditions for growing spaces based upon grower's preferences. Understand possible air-to-air energy recovery

configurations commonly available in air handlers.

Indoor Agriculture: HVAC System Design Considerations - Trane

That's why we developed Trane Air Conditioning Economics, or TRACE™—an award-winning design-and-analysis software program that helps HVAC professionals optimize the design of a building's heating, ventilating and air-conditioning system based on energy utilization and life-cycle cost.

TRACE 700

HVAC Design Tools HVAC design tools include such popular items as the Trane Ductulator™, psychrometric charts, and load estimating forms. Learn more about the order process here. Ductulator - Hand held rotating calculator used for sizing supply and return duct systems using the equal friction design method.
