Uplink - Downlink is an outstanding history of the NASA Deep Space Network. However, Progressive Management Publications did a very poor job of converting the book's excellent illustrations rendering the captions essentially unreadable. The publisher needs to replace this Kindle edition with the illustrations redone properly.

Uplink-Downlink: A History of the Deep Space Network, 1957 ...

Uplink-Downlink: A History of the Deep Space Network, 1957 ...

Therefore, it is appropriate that the Deep Space Network be recognized at this time for its contribution to this remarkable record of progress in our knowledge of the solar system. "Uplink-downlink" presents this record clearly for the attention of specialists, policymakers, students, and general readers.

Uplink-downlink: A History of the NASA Deep Space Network ...

Read "Uplink - Downlink: A History of the Deep Space Network 1957-1997, Mariner, Viking, Voyager, Galileo, Cassini Eras, DSN as a Scientific Instrument (NASA SP-2001-4227)" by Progressive Management available from Rakuten Kobo. This official NASA history document - converted for accurate flowing-text

Uplink-Downlink: A History of the Deep Space Network 1957 ...

We investigate the congruence of the directional properties of uplink (UL) and downlink (DL) as seen from the base station in WCDMA of UMTS by means of spatial channel measurements. Our study illustrates that the directional properties of the mobile radio channel are strongly correlated in uplink and downlink radio channels. Therefore, the utilization of spatial information derived during ...

[PDF] Spatial Reciprocity of Uplink and Downlink Radio ...

Uplink-Downlink transforms the technical records of a major NASA facility, unique in the world, into a viable historical narrative covering 40 years of its critical involvement in the United States space program.

Uplink-Downlink: A History of the Deep Space Network, 1957 ...

In GSM network, the packet transmission from MS to BTS is known as uplink where as from BTS to MS is known as downlink. In GSM frequency range from 890 MHz to 915 MHz is used as uplink frequency where as 935 MHz to 960 MHz is used as downlink frequency. Refer GSM system tutorial>>. What is Downlink ?

Uplink vs Downlink | difference between Uplink and Downlink

Traffic and signalling flowing within the base station subsystem (BSS) and network switching subsystem (NSS) may also be identified as uplink and downlink. Pertaining to computer networks, a downlink is a connection from data communications equipment towards data terminal equipment. This is also known as a downstream connection. Forward link

uplink downlink cover - NASA History Division

The downlink data rate is based on the uplink data rate, so if you send efficient uplinks, the network will respond with efficient downlinks. Downlink messages should be avoided if possible, and if you send downlink, keep the payload small. Confirmed Uplink is often not necessary. Try to make your application work without confirmations.

Buy Uplink-Downlink: A History of the Deep Space Network ...

Downlink is a telecommunication term pertaining to data which is sent out or downwards from a higher level or portion of a network. Traditionally, it refers to a satellite communications process where data is sent from a satellite down to an earthbound terminal or device, hence the word "down." It is also used in other fields of networking like cellular and computer networking, where it is used in a similar manner but may or may not involve the directional meaning of up or down.
