Upstream Valuation Considerations. E&P companies' primary assets are their oil and gas reserves — that is, hydrocarbons below the surface that have not yet been produced and are economically viable to extract. Reserves can be classified into two main categories: proved and unproved reserves.

Valuation Methodologies in the Oil & Gas Industry | Stout

The oil and gas industry is usually divided into three major sectors: upstream (or exploration and production- E&P), midstream and downstream. The upstream sector includes searching for potential underground or underwater crude oil and natural gas fields, drilling exploratory wells, and subsequently drilling and operating the wells that recover and bring the crude oil or raw natural gas to the ...
