Win32 Perl Programming: The Standard Extensions Second Edition Introduction Since I published the first edition of Win32 Perl Programming: The Standard Extensions, quite a bit has changed. Perl has changed versions, a slew of new extensions have been written, bugs have been squashed, new bugs have been discovered and the cycle has continued.

Win32 Perl Programming: The Standard Extensions, Second ...

After your Perl application loads the Win32::ODBC extension, it needs to initiate a conversation with a database. This is performed by creating an ODBC connection object using the new command: `$db = new Win32::ODBC($DSN [, $Option1, $Option2, ...]);` The first parameter (\$DSN) is the data source name. This parameter can be either a DSN or a DSN string.

Windows NT Win32 Perl Programming: The Standard Extensions ...

Win32 Perl Extensions Many independent coders have written extensions that only run on Win32 platforms. Such extensions range from an interface into dynamic link library files (DLLs) to remote access ... - Selection from Win32 Perl Programming: The Standard Extensions, Second Edition [Book]
